

Bringing the World Simply the Best Colostrum

by Dr. Anthony Kleinsmith

I grew up on a small dairy farm in Cache Valley, the main dairy center in Utah where high-quality cheeses are made. By the time I was six years old, my dad had me milking cows by hand, and before I was ten, I was routinely doing it morning and night. My dad always taught me that we had to make sure that newborn calves got enough "first milk" in them to assure that they would develop into healthy cows. He would then put some of the "first milk" into a nursing bottle and have me feed it to the calf.

Well, that "first milk," I later learned, is one of the most valuable anti-aging nutritional tools today. Were you aware that human growth hormone (HGH) was isolated from colostrum, synthesized and has grown into a multibillion-dollar industry known as anti-aging medicine? While working at several anti-aging clinics, I found that synthetic HGH used in the therapies came from colostrum.

I also found out that there were a few companies in the United States that were producing bovine colostrum, and I decided it was time for colostrum dietary supplements for humans. A lot of inaccurate things have been said about colostrum and its benefits, and most of the information doesn't make any sense. Some companies claim their colostrum is collected from several milkings after the birth of the calf. This contradicted the research from top scientists in the dairy field. Some products make claims about the "advantages" of removing some of the components from the colostrum. This doesn't make any scientific sense either, and in my youth, the intact "first milk" was always beneficial to the calf, and none of the calves that we ever raised showed any negative effects.

I took my questions to the top scientific professionals in the field. Their answers set me straight and made me a bit upset with companies that were showering falsehoods on the consumer for the sake of making a profit. I decided to produce and market the finest colostrum available and to bring the truth to the consuming public. My wife and I mortgaged our house and our worldly possessions and our company, Anovite, was born.

Colostrum6 is Mother Nature's perfectly formed natural nanotechnology for balancing the body. It contains all of the anti-aging factors, immune factors, essential factors basics and metabolic factors, in their whole-food form. Colostrum6 from Anovite comes from USDA Grade A (United States) colostrums; our dairy cows are free from synthetic hormones, antibiotics and pesticides. Whether it is

losing inches from around your waist, ailment-targeted benefits, auto-immune regulation or helping the body to fight off troubling pathogens as part of its normal healthy defenses, Colostrum6 has all the major building blocks to help you achieve the wellness you are looking for.

The base for all my formulations has been and will always be Anovite Colostrum6, with all of its components intact. We only take the moisture out, and that leaves in all those beneficial constituents that allow the body systems to become balanced or a depleted body to be rejuvenated. We have Colostrum6 in a pure capsule (meaning no fillers), a pineapple lozenge for adults, a Moo Chew for children, and a 6.5-ounce and kilo powder that are very versatile in how you can use them.

Then we have the LeptiTrim6 Accelerated line, a base of Anovite Colostrum6 with leptin, for safe inch-loss. LeptiTrim6 is one of the few products on the market that has sustained long-term fat loss. I was the first person to put out the original formula. My own waistline went from 48 inches to 32 trim inches.

LimuZ6 Plus, again with our Colostrum6 base, is designed to enhance four major areas of your health—immune system, anti-aging, memory and your endocrinology—while removing heavy metals and toxins, balancing pH and providing energy on a level where 85 percent feel a difference within 15 minutes without stimulants.

It has been very rewarding for me to have folks from all over the world contact me with their testimonials, before and after photographs and results, that is why we have created www.DrKleinsmith.com so that people can ask questions, get answers and do it in an interactive format with me. I guess my dad was right: growing up on a small farm and trying to be neighborly has given me the work ethic and caring to make Anovite and our Colostrum6 the absolute best in the world.

Resources

Colostrum6 and other formulas detailed in this article are available at health food stores, natural pharmacies and natural lifestyle retailers.
